

## **CumuloLogic Announces General Availability of Java Cloud Application Platform 1.0**

*CumuloLogic Cloud Application Platform 1.0 is designed to enable Global 2000 enterprises and Cloud Service Providers to seamlessly develop, migrate and deploy Java applications in any cloud.*

**Cupertino, CA – July 11, 2012** – CumuloLogic today announced the general availability of CumuloLogic Cloud Application Platform v1.0, the platform of choice for Global 2000 and Cloud Service Providers to build a Java Platform-as-a-Service (PaaS) in their datacenters. CumuloLogic’s enterprise-ready platform transforms virtualized environments and Infrastructure-as-a-Service (IaaS) clouds, such as Citrix CloudStack, OpenStack and VMware vSphere, to high-value PaaS, simplifying the development, deployment and runtime management of mobile, web and enterprise applications in private and hybrid clouds.

“We are very pleased with the ease of integration that we’ve seen with the CumuloLogic product,” says Matthew Porter, CEO and Co-Founder of Contegix. “Working with CumuloLogic provides for a natural extension of our MiraCloud platform and delivers on our commitment to deliver robust technology in a very flexible way.”

“As one of the first CloudStack partners to be certified Citrix Ready®, CumuloLogic remains an important ecosystem partner for us. We believe that Platform-as-a-Service is a key element to driving greater cloud ROI for our customers, and we’re very pleased to see that market maturing even further with this product release from CumuloLogic.” - Peder Ulander, VP of Product Marketing, Cloud Platform Group, Citrix Systems.

CumuloLogic Cloud Application Platform v1.0 improves developer productivity, lowers the cost of managing applications on clouds, enables DevOps collaboration, and streamlines the migration of applications to clouds - public or private.

“We are extremely excited about the release of CumuloLogic Cloud Application Platform 1.0, the most robust, vendor-independent platform on the market today,” says CumuloLogic President, Mike Soby. “We’re looking forward to continuing the advancement of the platform and delivering real business results for our customers and partners.”

CumuloLogic PaaS focuses on three key functional areas:

### **Application Development**

Developers can create a new cloud-based application using their preferred IDE - no proprietary SDK required insuring portability, and deploy their application with a single-click deployment in any cloud.

# PRESS RELEASE

## **Application Migration**

Existing Java applications can be migrated from physical or virtual environments with minimal-to-zero code re-write to leverage the elasticity and economics of the cloud.

## **Application Management**

The application management function includes all the enterprise-ready features out-of-the-box, including high availability and self-healing, monitoring and real-time application-level usage metering.

“We are excited to be working with CumuLogic. After evaluating several PaaS offerings, we found that the CumuLogic platform provided the most valuable extension for our CloudStack clients and we’re looking forward to building deep practice competency around the integrated solution.” - Giles Sirett, Managing Consultant and Founder, ShapeBlue.

**Pricing and Availability:** CumuLogic Cloud Application Platform is available immediately. To evaluate a CumuLogic’s platform free of charge for 30 days, please contact CumuLogic at [info@cumulogic.com](mailto:info@cumulogic.com). You can also register with Contegix at [contegix.com/paas](http://contegix.com/paas) for the hosted version.

## **About CumuLogic**

CumuLogic is a Platform-as-a-Service (PaaS) software provider that enables enterprises, cloud providers and ISVs to develop and deploy Java applications in public, private and hybrid cloud environments. CumuLogic is redefining PaaS to include a complete platform for developing, migrating, running, managing, monitoring, and metering applications in the cloud. For more information, go to [www.cumulogic.com](http://www.cumulogic.com).
