CloudCentral Announces Availability of Cloud Services, Powered by CumuloLogic

Web and Global 2000 enterprises can now accelerate cloud adoption by leveraging the power of Database-as-a-Service, Platform-as-a-Service and much more with CloudCentral's new Cloud Services Portfolio.

Canberra, Australia and Santa Clara, Calif. – May 14, 2013 – CloudCentral, an Australian based leading provider of cloud infrastructure services, and CumuloLogic, the leading innovator in cloud platform technologies, today announced immediate availability of CloudCentral Cloud Services powered by CumuloLogic. CloudCentral customers can test and evaluate CloudCentral's Platform-as-a-Service (PaaS) and other Cloud Services for 30 days free of charge.

Australian developers, enterprise and government customers are evaluating clouds and platforms to understand how the cloud model fits their business requirements. With this offering, customers have an immediate opportunity to use a cloud platform for the rapid development and deployment of cloud-based applications on an enterprise-ready cloud infrastructure optimized for compute and storage performance. CloudCentral Cloud Services will allow developers to accelerate their time-to-market and never again worry about the underlying infrastructure to support the scale they need.

"Australian ICT Solution Providers including Software-as-a-Service (SaaS) Developers, Application Service Providers, Online Services and Managed Service providers are seeking an Australian Cloud Services alternative to those provided by Google and Amazon Web Services (AWS). CloudCentral's Cloud Services offering delivers industry leading functionality and performance, with strong guarantees around security, data sovereignty and data protection. Choosing CloudCentral ensures customers data remains within Australia and is managed by an Australian company," said CloudCentral Chief, Kristoffer Sheather.

"Organizations that are looking for an enterprise-class public cloud for new application development and for migrating existing applications can now leverage CloudCentral's public cloud infrastructure with AWS-style cloud services powered by CumuloLogic. We are very excited to enter the Australian market with a great partner like CloudCentral to deliver the integrated features and performance required by enterprise developers," said CumuloLogic President and CEO, Mike Soby.

"For organizations like CloudCentral that are looking to deliver automated, elastic, self-service clouds to global customers, Citrix CloudPlatform with CumuloLogic's platform delivers efficient, limitless scale and fast deployment of applications. As a result, CloudCentral's clients of any size can quickly and easily expand and innovate

NEWS RELEASE

their business in the cloud,” said Derrick Loi, Senior Director, Cloud Platform Group, Asia Pacific at Citrix Systems.

CloudCentral Cloud Services provide support for new and existing applications, and can be deployed on both private hosted and public clouds, enabling a clear path toward a seamless hybrid cloud model.

Special Offer

For a limited time, CloudCentral is offering its new cloud services portfolio free of charge for 30 days. Developers can request a free account at <http://www.cloudcentral.com.au>.

At the conclusion of the evaluation period, enterprises will be able to continue to use dedicated services on CloudCentral’s Australian cloud platform. CloudCentral Cloud Services will be available on-demand with hourly, monthly or annual pay-as-you-grow (PAYG) pricing like the rest of CloudCentral’s products including Infrastructure-as-a-Service (IaaS).

Learn More Via Our Webinar

CloudCentral and CumuLogic will host a joint introductory webinar explaining how CloudCentral Cloud Services can support easier development, deployment and scaling of applications. The webinar will be hosted on June 5, 5PM PDT / June 6, 10AM AEST. Check <http://bit.ly/CCCLwebinar> to sign up.

About CloudCentral

CloudCentral is a 100 percent Australian owned and operated provider of highly scalable, secure, dynamic cloud infrastructure services. We focus on providing superior services to Australian ICT Solution Providers including Software-as-a-Service (SaaS) developers, Managed Service Providers, Application Service Providers, and IT Systems Integrators and Telcos.

CloudCentral’s cloud platform services are provided on-demand, with a true pay-as-you-grow model with no upfront costs. CloudCentral is a member of the Australian Government Information management Office (AGIMO) Data Centre-as-a-Service (DCaaS) Multi-Use-List (MUL) for cloud services.

CloudCentral’s Australian data center locations include TransACT (Canberra) and NEXTDC (Canberra). TransACT is a member of the Australian Government Whole-of-Government (WHoG) approved panel.

CloudCentral services include a strong Service Level Agreement (SLA) and strong guarantees around data sovereignty and security. For more information, go to <http://www.cloudcentral.com.au>.
