

PRESS RELEASE

Contegix Announces Availability of New MiraCloud Services, Powered by CumuloLogic

Web and Global 2000 enterprises can now accelerate time-to-market by leveraging the power of MySQL- and MongoDB-based Database-as-a-Service, Platform-as-a-Service and much more with Contegix's new Cloud Services Portfolio.

St. Louis, MO and Santa Clara, CA – July 30, 2013 – Contegix®, the cloud computing, colocation and managed hosting company that empowers customers by providing Go Beyond™ support, and CumuloLogic, the leading innovator in cloud platform technologies, today announced immediate availability of MiraCloud PaaS and Cloud Services powered by CumuloLogic.

MiraCloud PaaS, which is available as a preview release, provides users instant access to services, such as fully self-managed and scalable Relational and NoSQL Database-as-a-Service (DBaaS), Elastic Load Balancer and distributed in-memory Cache-as-a-Service. These MiraCloud Cloud Services will be available as a preview offering until October 1st and are being offered on a complimentary basis to MiraCloud customers.

Developers, enterprises and organizations everywhere are adopting clouds and platforms for web applications, big data analysis, disaster recovery and other use cases to meet their business requirements. With MiraCloud PaaS and Cloud Services, cloud users have the opportunity to use a cloud platform for development, migration and deployment of Java and PHP applications on a robust cloud infrastructure powered by Citrix CloudPlatform and optimized for scalable web applications. The MiraCloud PaaS and Cloud Services will allow developers to accelerate their time-to-market while focusing on developing quality applications rather than managing the infrastructure to support the scale they need.

"We are proud to expand our MiraCloud offerings to include PaaS, MySQL- and MongoDB-based DBaaS features as well other outstanding CumuloLogic powered services. MiraCloud, the most flexible self-managed cloud solution on the market has just become even more robust for our customers, from our enterprise customers to startups," said Matthew Porter, CEO of Contegix.

"For organizations like Contegix that are looking to deliver innovative, self-service clouds to global customers, CumuloLogic cloud services combined with Citrix CloudPlatform powered by Apache CloudStack, delivers enterprise-grade, efficient deployment of applications," said Krishna Subramanian, Vice President Product Marketing, Cloud Platforms Group at Citrix. "As a result, customers can focus on innovating and solving business requirements in the cloud."

PRESS RELEASE

“Working with a great cloud computing company like Contegix is a perfect fit for CumuLogic. The combination of MiraCloud IaaS and our up-stack services provide customers with the best possible integrated solution,” said CumuLogic President and CEO, Mike Soby. “As cloud continues to advance, developers need more services like DBaaS and PaaS, but they need them to come with an SLA and a world class support team, which is why the partnership with Contegix is so meaningful.”

Contegix Cloud Services provide support for new and existing applications, and can be deployed on both private hosted and public clouds, enabling a clear path toward a seamless hybrid cloud model.

Special Offer

New and existing MiraCloud customers are eligible to take advantage of exciting offers related to the new MiraCloud Cloud Services portfolio. For a limited time, Contegix is offering all new MiraCloud customers a \$250 service credit on any new MiraCloud account. MiraCloud PaaS and the Cloud Services portfolio will also be included on a complimentary basis during the preview release evaluation period.

Visit www.contegix.com/miracloudpaas for additional details.

At the conclusion of the preview release evaluation, enterprises will be able to continue to use dedicated services on MiraCloud. MiraCloud PaaS and Cloud Services will be available on-demand with hourly, monthly or annual pay-as-you-grow pricing.

About Contegix
