

Cumulogic Connector for Citrix CloudPortal Business Manager

Enabling IT-as-a-Service for Enterprises and Cloud Providers

CumuLogic Cloud Services Connector together with Citrix CloudPortal Business Manager and CloudPlatform provide a comprehensive cloud solution for enterprises to deliver IT-as-a-Service, and for Cloud Providers to offer a portfolio of high value, high margin cloud services for application management.

Citrix® CloudPortal™ Business Manager is a cloud services delivery platform that enables enterprises and service providers to unify the commerce, user management, provisioning and operational aspects of a cloud into a single cloud interface, enabling the journey to IT-as-a-Service. CumuLogic Cloud Services Connector for Citrix CloudPortal extends these services to databases, platform, caching clusters, load balancers and more to deliver Database-as-a-Service, Caching-as-a-Service, and a lot more. The CumuLogic platform, together with Citrix CloudPortal Business Manager and Citrix CloudPlatform, provides a comprehensive cloud solution for enterprises to deliver IT-as-a-Service, and for Cloud Providers to offer a portfolio of high value, high margin cloud services for application management.

With the Citrix Ready CumuLogic Connector, IT organizations that are paving the path to IT-as-a-Service can manage subscriptions, usage metering and billing, delivering an integrated ready-to be deployed solution including services such as Database-as-a-Service, Platform-as-a-Service, Cache-as-a-Service, Load Balancer-as-a-Service and many others. Benefits include:

- Increased revenue and cloud utilization by delivering application services rather than commodity compute and storage services
- Improved developer productivity by over 30% by enabling self-service of application services for custom development
- Lower cost of operations of databases and application stacks by over 35%
- Access from a single control pane for users to consume cloud services as subscriptions
- Usage and billing managing and monitoring through Citrix CloudPortal Business Manager

Citrix CloudPortal Business Manager and the CumuLogic Connector enable enterprises and Cloud Providers to deliver robust and scalable cloud services and an application platform through a single console pane – effectively enabling IT-as-a-Service. Features included in the CumuLogic Cloud Services Connector for Citrix Cloud Portal Business Manager include:

Cloud Services Catalog

Creates a catalog for users to provision cloud services in self-service manner. CumuLogic services include MySQL-powered SQL Database-as-a-Service, MongoDB-powered NoSQL Database-as-a-Service, Elastic Cache and Elastic Load Balancer.

Subscriptions to Cloud Services

Users can subscribe to custom-packaged services with hourly or monthly billing. Subscriptions provide a predictable way for customers to track their usage and cost.

Flexible Pricing Schemes

Use different pricing according to the type of customer, partner, organization and geography. Enterprises and Cloud Providers can customize pricing for cloud services in different currencies to deliver localized services.

Usage Tracking, Billing and Charge Backs

Provide access to up-to-date, real time usage information and invoices to end-users. Usage information can be utilized for charge backs by enterprise IT.

Single Sign-On

Enterprises and Cloud Providers can launch the CumuLogic dashboard from Citrix CloudPortal Business Manager using single-sign to take advantage of CumuLogic services that may not be currently available on Citrix CloudPortal Business Manager.

Call to Action

With the CumuLogic Connector for CloudPortal Business Manager, IT organizations that are paving the path to IT-as-a-Service can manage subscriptions, usage metering and billing, giving an integrated ready-to be deployed solution including services such as Database-as-a-Service, Platform-as-a-Service, Cache-as-a-Service, Load Balancer-as-a-Service and many others.

Cloud Providers can leverage the extensibility of the CumuLogic platform and Citrix CloudPortal Business Manager to add new services in order to generate additional revenue and address new market segments.
