

## PRESS RELEASE

### **Couchbase and CumuloLogic Team Up to Deliver Production-Ready Couchbase-as-a-Service on Private, Public, and Hybrid Clouds**

*World's first on-premises Database-as-a-Service platform now empowers developers to access Couchbase "as a service" via on-premise, public, and hybrid cloud infrastructure.*

Mountain View and Santa Clara, Calif., August 19, 2014 – Couchbase, Inc., provider of the most complete NoSQL database, and CumuloLogic, the leading innovator in private Database-as-a-Service (DBaaS) software, are pleased to announce a partnership to bring developers seamless access to Couchbase Server "as a service" via on-premises, public, and hybrid cloud infrastructure. The new partnership provides the industry's first production-ready Database-as-a-Service platform that enables developers to dramatically speed time-to-market for mission critical applications powered by Couchbase Server.

The CumuloLogic DBaaS platform makes it easy for IT to deliver database infrastructure on-demand for agile development teams by automating the provisioning and management of Couchbase Server via a self-service portal. By supporting on-premises deployments, this joint solution enables IT operations teams to retain control of the underlying infrastructure for governance and security.

The CumuloLogic DBaaS platform is extremely simple to deploy. It also provides high availability and resiliency, backup and restore, and performance optimization functions to meet the requirements of mission critical applications.

"The Couchbase and CumuloLogic partnership will make it easier for businesses to easily deploy enterprise grade NoSQL for mission critical applications," said Rod Hamlin, Vice President of Business Development, Couchbase. "With the CumuloLogic self service portal for support of on-premises, cloud or hybrid deployments, businesses have the flexibility to access the power of Couchbase Server's unmatched performance, scalability and reliability in the deployment model that best fits their need."

"CumuloLogic's DBaaS platform not only makes Couchbase Server development simple for developers, it also empowers Ops teams to easily deploy Couchbase Server at a very large scale, inside the firewall," said Chip Childers, Vice President of Product Strategy, CumuloLogic. "We're excited to work with Couchbase to provide a consistent DBaaS experience for application development, test and Ops teams."

Couchbase and CumuloLogic will be demonstrating provisioning and management of Couchbase Server via the CumuloLogic DBaaS platform during a [live webinar](#) on

## PRESS RELEASE

September 11<sup>th</sup>, 10:00 AM Pacific, highlighting how this joint solution can help Fortune 1000 customers speed time-to-market by enabling on-demand, self-service provisioning and management of Couchbase Server in just minutes. This also dramatically improves developer productivity and reduces friction in getting new applications to market.

The CumuLogic DBaaS platform runs on Apache CloudStack, Citrix CloudPlatform, Eucalyptus, OpenStack and VMware vCloud private clouds, virtualized environments and bare metal. The CumuLogic DBaaS Platform is available for download at [cumulogic.com/downloads](http://cumulogic.com/downloads).

### **About Couchbase**

Couchbase provides the world's most complete, most scalable and best performing NoSQL database. Couchbase Server is designed from a simple yet bold vision: build the first and best, general-purpose NoSQL database. That goal has resulted in an industry leading solution that includes a shared nothing architecture, a single node-type, a built in caching layer, true auto-sharding and the world's first NoSQL mobile offering: Couchbase Mobile, a complete NoSQL mobile solution comprised of Couchbase Server, Couchbase Sync Gateway and Couchbase Lite. Couchbase Server and all Couchbase Mobile products are open source projects. Couchbase counts many of the world's biggest brands as its customers, including AT&T, Amadeus, Bally's, Beats Music, Cisco, Comcast, Concur, Disney, eBay / PayPal, Neiman Marcus, Orbitz, Rakuten / Viber, Sky, Tencent, Tesco, Verizon and Willis Group, as well as hundreds of other household names worldwide. Couchbase is headquartered in Silicon Valley, and has raised \$115 million in funding from Accel Partners, Adams Street Partners, Ignition Partners, Mayfield Fund, North Bridge Venture Partners and WestSummit. ### **About CumuLogic**

CumuLogic is a software provider that enables enterprises and Cloud Providers to deploy Database-as-a-Service (DBaaS) functionality on any infrastructure – cloud environments, VM pools and bare metal. The CumuLogic DBaaS software platform empowers developers and DBAs with self-service database deployment and operations, while enabling IT Ops to retain control of the underlying infrastructure for data governance and security.
